Saab 9-2X e-Booklet

Imagine a place without borders. Where asking “what if?” is a way of life and the freedom to do things differently is, well, everything. A place that goes beyond the obvious. Conventional wisdom is never accepted if there’s a better solution. This is the state of independence. It’s where every Saab comes from. And you don’t need a map to get there.

The sporty new Saab 9-2X lets you taste life in big bites. Experience the exhilaration and capability of full-time all-wheel driving. Let your instincts and the road ahead guide you, so that you can ask “what if?” a little more often – without having to leave your gear behind or wait for tomorrow.

Welcome to the state of independence.

All-wheel driving.

Real-time loving.

A few minutes behind the wheel and you'll know what the Saab 9-2X is all about. Pure driving exhilaration with every shift of the gears and every bend in the road.

You can count on full-time all-wheel drive (AWD) with dynamic power distribution between front and rear wheels, not to mention the extra stability that comes with a very low center of gravity. Drive down a busy city street or explore a new stretch of a winding coastal road. The Saab 9-2X offers exceptional cornering performance and consistent behavior.

# Turbo

Turbo is split-second acceleration in action. And that's exactly what you get with the Saab 9-2X Aero. Experience the response and surge of pure power when you need it most – in everyday driving situations.

Feel the extra muscle and confidence in the urban jungle or when overtaking an 18-wheeler on the open highway. The Aero's turbocharged engine gives you remarkable torque throughout the medium range.

To capture the spirit, the Saab 9-2X comes with sporty seats that are progressive and comfortable. For extra support, pronounced side bolsters help keep you in place when tackling those tight curves.

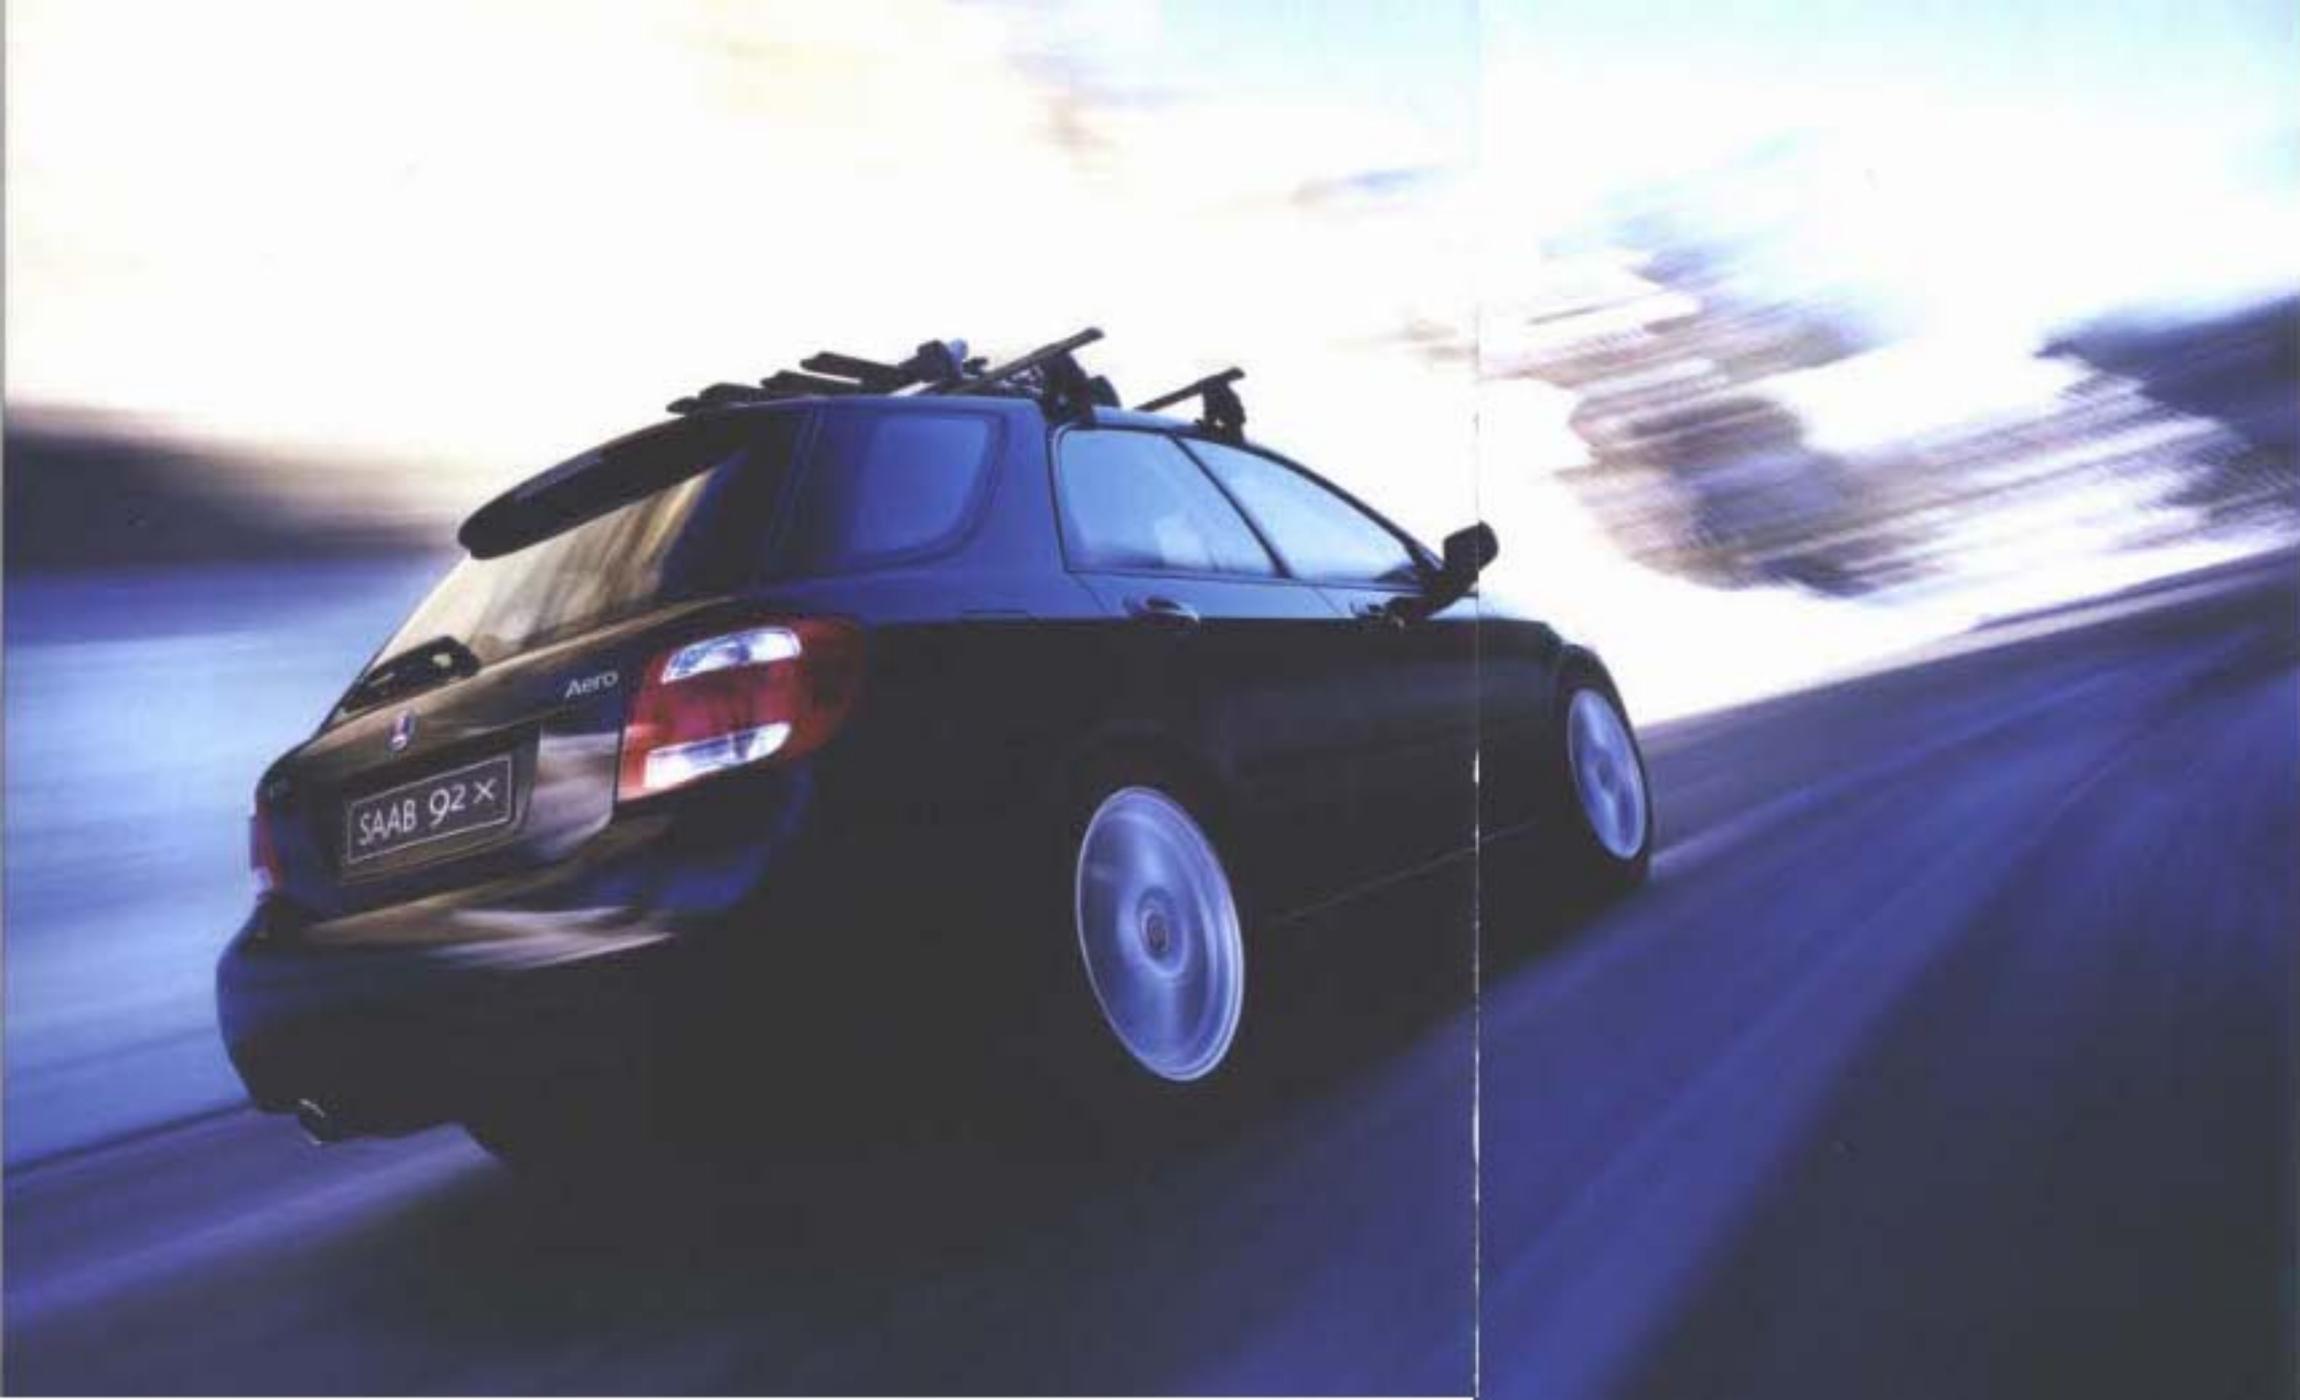

# Inspiration with a purpose.

The Saab 9-2X takes form from function to the extreme. The air intake on the hood gives the car a sporty look, but that's not why it's there. It's taking care of a vital function — funneling loads of air to cool the intake charge.

The fact is that the Saab 9-2X is designed with a purpose inside and out. Whether it's the car's smooth, aerodynamic lines, low, aggressive stance, the clean and uncluttered driver's environment, or its dynamic gear-carrying capacity.

So explore it and enjoy it. Have we mentioned the acoustics of the high-performance audio system with in-dash CD player and powerful speakers? Yes, with the Saab 9-2X, inspiration is everywhere.

All the road-hugging qualities that make the Saab 9-2X fun to drive also contribute to safer driving. So get a grip – in almost any kind of weather.

# Working together

for active safety.

Safer driving and behind-the-wheel exhilaration go hand-in-hand in the Saab 9-2X. The full-time AWD, powerful Anti-lock Braking System (ABS) and emergency handling properties are designed to help you stay in better control and improve traction in wet and slippery road conditions. What's more, the car's consistent handling behavior helps you to react more quickly and with greater confidence.

The Saab 9-2X is equipped with safety systems designed to help reduce the risk of injury. Front airbags and active head restraints help protect the driver and front passenger in the event of a collision. In addition, a head/thorax side airbag is integrated into the outer edge of each front seat backrest. And all five seats are fitted with three-point seatbelts.

An advanced chassis with fully independent suspension and wide track helps to provide consistent handling behavior and precision steering.

The front seats feature an active head restraint designed to help reduce the risk of neck injury in the event of a rear-end collision.

Saab 9-2X Aero

Max. output: 227 hp | Max. torque: 217 lb. ft.

# The power to choose.

## Linear or Aero?

For inspiration at a personal level, the Saab 9-2X comes in two eye-catching versions: Linear and Aero.

The Saab 9-2X Aero is the obvious choice for true driving enthusiasts eager for a turbocharged 2.0 liter engine and pure capability of the available 227 horsepower. Giving you exhilarating performance and take-your-breath-away acceleration.

To keep the turbo power in check, the Aero comes with extra large ventilated front disc brakes with four-piston calipers. It also includes

a sporty air intake on the hood, an enlarged exhaust pipe and integrated front fog lights. Additional features include 5-spoke Twin 16" light alloy wheels (17" wheels are optional), metallic-framed instrument dials and a 3-spoke leather-trimmed steering wheel.

The Saab 9-2X Linear is equipped with an energetic 2.5 liter engine. The squat low stance and 5-spoke 16" sculpted alloy wheels are clear indicators of its spirited performance. And, with several options to choose from, the choice is yours.

Saab 9-2X Linear

Max. output: 165 hp | Max. torque: 166 lb. ft.

# Ready when you are.

## Don't hold back.

Go ahead. Follow your instincts and enjoy the detours. The Saab 9-2X gives you an energetic, light-on-your-feet versatility – and all the opportunities that come with it.

Imagine the everyday agility of 27.9 cubic feet of cargo area to play with. Fold the rear seat down and you can more than double the room. A retractable cargo cover provides extra privacy. The rear seat can also be split folded for easy access and flexibility.

Not to mention the convenience of loading and unloading through the rear door.

For larger items and sports gear, you can equip your Saab 9-2X with an available roof rack system with special holders for bikes, skis, boards, whatever your pleasure.

What's more, the full-time AWD makes the Saab 9-2X perfect for towing a smaller trailer with a jet-ski or small boat. So why wait for tomorrow?

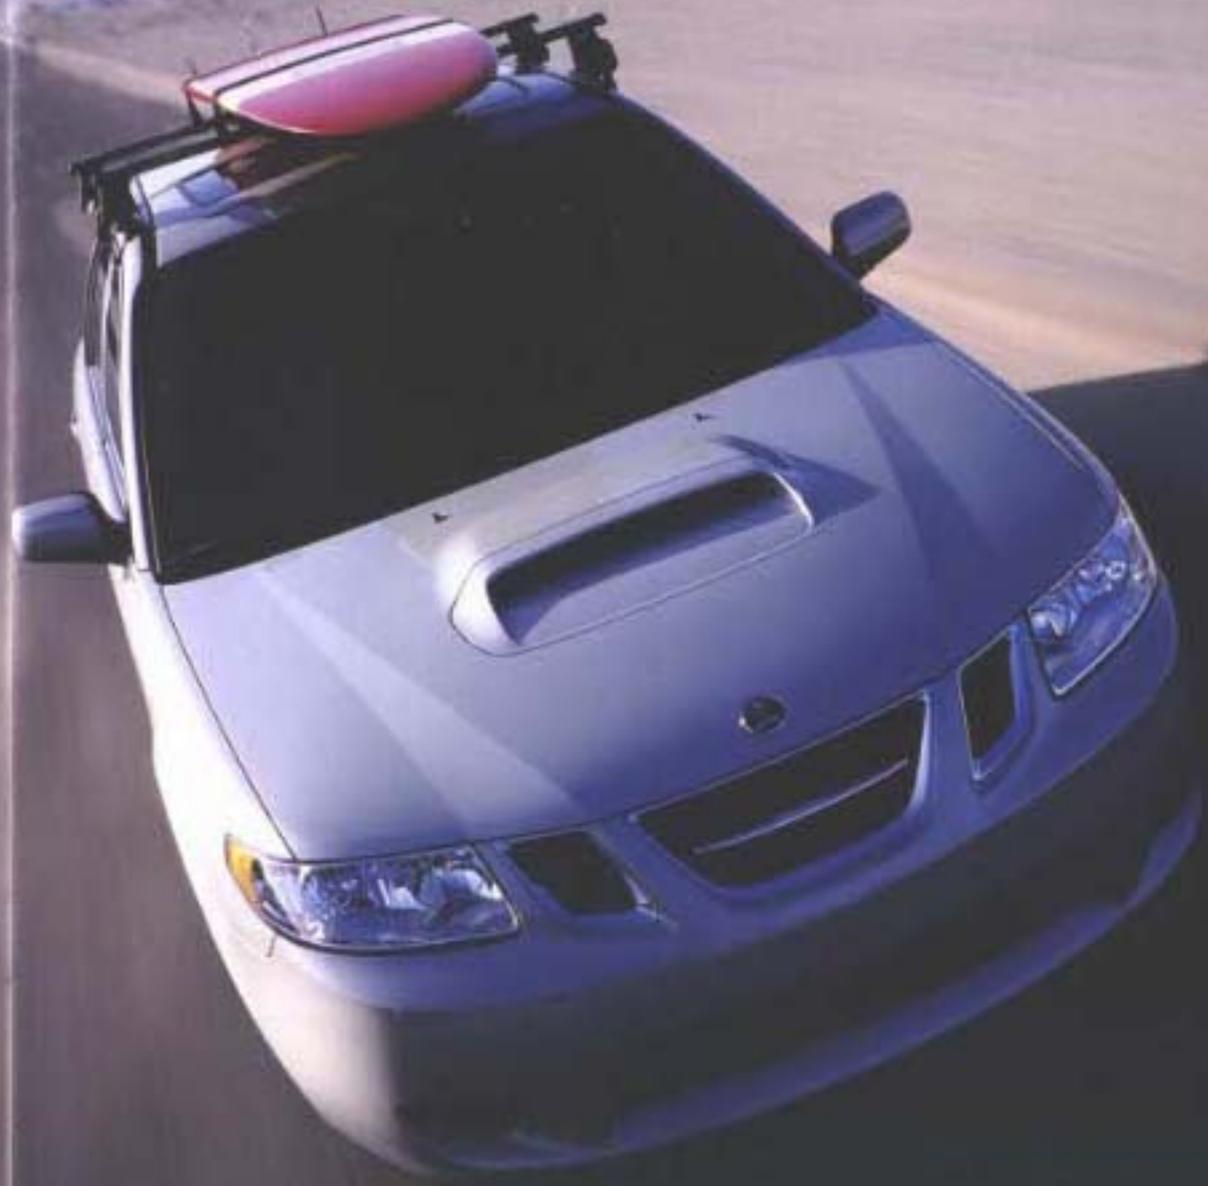

Now it's up to you.  
Explore the Saab 9-2X and  
invent new ways to use it  
– without having to ask for  
permission.

The freedom to be you.

What could  
be better?

Always drive with performance wheels and tires for winter and secure pavement including high performance tires. These cars are designed for optimum performance and handling in warm climates. They are not suitable for snowy or icy weather conditions. Four drive shaft connections, you should equip your vehicle with skidsteer or winter tires, which offer better traction under these conditions. We suggest you use the recommended winter or all-weather tires specified for your car or to equivalent. These tires perform best and also have a lower speed limit than the all-weather tires. In order to avoid tire, rim, or vehicle damage, it is important that the relative position is regularly checked and maintained at recommended levels. Please also remember in making your selection that while these tires deliver maximum handling, they may still be continuously and more easily worn than other choices. Finally, please read and wear your seat belt and please for further information on all these rights please contact the contact network, your local dealer or call 1-800-344-1234.

You can choose from an exciting palette of sporty colors. All colors have an extra clear-coat to enhance the paint finish. The seat upholstery consists of woven textiles in contrasting texture and color. Leather trim is optional. The choice is yours.

**Upholstery**

A Linear: Woven Textile upholstery, Black/Parchment.

B Aero: Sport Textile upholstery, Black/Parchment.

C Optional: Sport leather upholstery, Black/Parchment.
